

My Reflections

G.G from Saint Peter Highschool

Before/After Mission Statements

First Statement: I will use my knowledge to hopefully get a job making web pages for people and learn more about coding!"

Second Statement: I will use my knowledge from DiscoverIT to find and take future opportunities to learn are grow more, and obtain a successful career on the way!

What I Learned

1. Naming Conventions (Very Helpful)
2. Organizing (Important)
3. Always Be Ahead Of Schedule
4. HTML, CSS, Java, Javascript, Databases

These skills will allow me to reach way beyond my first mission statement and I will use them to follow through with my new one.

I have learned that I'm a major procrastinator and I need to step up my game if I am going to get anything done. It is very important to stay ahead of the deadline incase things do not go they way they were planned.

Three Words

Responsibilities
Fun
Effective

I really enjoyed learning to code in Discover-IT, even when challenges arise I found myself wanting to learn how to fix them!
